

SPRINKLER SYSTEMS AND FIRE PUMPS

We supply and install fire sprinkler systems and fire pumps throughout Queensland. Creative Fire Protection has a large range of fire sprinkler and fire pump equipment readily accessible to install. Our 24 hour callout service can rectify any situation.

INSTALLATION:

Builders can simply contact our office and arrange installation of units in any construction whether it's for a new project or refit an existing building. All installations are done in compliance with appropriate codes and standards.

TESTING and MAINTENANCE:

Our onroad service vehicles also have supply of the most commonly needed sprinkler and pump components ready to go. We can supply and fit most parts for basic call out issues or otherwise we can arrange a speedy installation with just a phone call.

Maintenance and testing of your fire sprinkler systems and or pump systems ensures you have a functional suppression system when it's most needed. Creative Fire Protection can also complete your monthly, six monthly and annual testing requirements. All testing is in accordance with the AS1851 fire equipment maintenance standards.

WE CAN:

- Upgrade or modify any existing sprinkler / pump system
- Upgrade or move fire sprinklers
- Upgrade pump systems
- Upgrade or modify wiring to sprinkler / pump monitoring
- Add or remove flow switches
- Retro-fit an existing building
- New installation during construction
- Conduct monthly, six monthly, annual and 5 yearly testing
- Document and certify for regulatory requirements
