

FIRE DETECTION SYSTEMS

We can supply you with all your Fire Panel and related equipment. Creative Fire Protection has a large range of fire equipment in stock and ready to install.

INSTALLATION:

Our on road service vehicles also have supply of the most commonly needed alarm components ready to go. We can arrange a speedy installation with just a phone call.

Builders can simply contact our office and arrange installation of units in any new construction whether it's for a stadium, office block or small shop. All installations are done in compliance with appropriate codes and standards.

TESTING and MAINTENANCE:

Maintenance and testing of your fire alarm system ensures you have a functioning detection system. All testing is in accordance with the AS1851.

WE CAN:

- Upgrade or modify any existing panel
- Upgrade or move heat and smoke detectors
- Upgrade or modify wiring
- Add or remove detectors, door release devices etc
- Retro-fit an existing building
- New installation during construction
- Locate and rectify faults and problems
- Conduct monthly, annual and five yearly testing
- Document and certify for regulatory requirements

We offer a 24 hour service for alarm resets and fault finding after activation.
