

HYDRANTS AND HOSE REELS

We supply and install fire hydrants and hose reels as well as supply a range of replacement parts. We operate throughout South East Queensland and Northern New South Wales. Creative Fire Protection has a large range of spare parts for all makes and models of hydrants and hose reel equipment in stock and ready to install.

INSTALLATION:

Our on road service vehicles also have supply of the most commonly needed hydrant and hose reel components ready to go. We can supply and fit most parts during your regular service visits if required or otherwise we can arrange a speedy installation with just a phone call.

Builders can simply contact our office and arrange installation of units in any construction, whether it's for a new project or refit an existing building. All installations are done in compliance with appropriate codes and standards, with all signs installed and units tagged and ready to go.

TESTING and MAINTENANCE:

Maintenance and testing of your fire hydrants and hose reels ensures you have a functional fire suppression system when it's most needed. Creative Fire Protection can also complete your six monthly testing requirements. All testing is in accordance with the AS1851 fire equipment maintenance standards.

WE CAN:

- Upgrade or modify any hydrant or hose reel
- Upgrade or move fire installations
- Add or remove flow switches connected to alarms
- Retro-fit an existing building
- New installation during construction
- Conduct six monthly, annual and five yearly testing
- Document and certify for regulatory requirements
