

EMERGENCY EVACUATION DIAGRAMS

Having emergency evacuation diagrams installed is mandatory for all workplaces.

All evacuation signs and diagrams produced by Creative Fire comply with relevant State Legislation, Australian Standards and OH&S requirements. We work to the most stringent Australian legislation, QLD Building Fire Safety Regulations 2008, in conjunction with Australian Standard 3745-2010 Planning for Emergencies in Facilities, to ensure your company not only meets your State or Territory requirements but exceeds them, thus providing a “best practice” approach for your company.

SERVICES
